# Magellan Static Controller

Instantly Eliminates Static Charge on Tips and Plates

The Magellan Static Controller instantly neutralizes static charges using alpha ionization technology.

Passing the tips or plates 1 to 2 inches above the Magellan Static Controller ionization cloud will neutralize the static charge.

## Features and Benefits of the Magellan Static Controller

- Produces a particulate free environment – no fans or brushes
- No calibration - Constantly balanced ionization cloud
- No outside power source required
- **Footprint is SBS standard** – so will fit on existing instrument platforms or manual usage
- Increase the pipetting accuracy by neutralizing static charge
- Material Safety Data Sheets – Not required for this device – exempt from restrictions
